DETAILED ACTION

Response to Amendment

1. This Office action is in response to the amendment filed 08/31/2009. Claims 1-17 are pending.

Claim Rejections - 35 USC § 103

- 2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 3. Rationales for the following rejections have been set forth in the previous Office action.
- 4. Claims 1-6 and 8-9, 11-13 and 16-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schimmel et al. (US 6,197,883) in view of Kramer et al. (US 6,433,100).
- 5. Claims 10, 14 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schimmel et al. (US 6,197,883) in view of Kramer et al. (US 6,433,100) as applied to claim 1 above, and further in view of Sherwin et al. (US 4,711,944).

Allowable Subject Matter

6. Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 1796

Response to Arguments

7. Applicant's arguments filed 08/31/2009 have been fully considered but they are not persuasive for the following reasons.

- 8. First, the applicant alleges that "the limitations of the present claims are not met by the combined disclosures of the cited art" because the claimed leveling agent is obtained by nitroxyl mediated controlled free radical polymerization whereas the flow control agents of Schimmel and the polymers of Kramer are prepared by controlled radical polymerization but not by nitroxyl mediated polymerization, and that in Kramer the nitroxyl group is introduced in a further step (Remarks, p. 9). It is noted that the present claims are product-by-process claims. What is being claimed is not a process of producing the leveling agent, but a leveling agent which is a (co)polymer capped at one terminal with an initiator fragment and at the other terminal with a nitroxyl radical. Such leveling agent is obvious from the combined teachings of Schimmel and Kramer as discussed in the previous Office action, which is herein incorporated.
- 9. Second, the applicant alleges that the present invention produces unexpected results by pointing to example 3B. Such showing of unexpected results is not persuasive because (1) the showing (i.e., from only one specific example) is not commensurate with the scope of the claims and (2) none of the comparative compositions in example 3 resembles the composition disclosed by Schimmel (i.e., they do not contain a leveling agent that is similar to Schimmel's flow control agent).

Conclusion

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vu Nguyen whose telephone number is (571)270-5454. The examiner can normally be reached on M-F 7:30-5:00 (Alternating Friday Off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu can be reached on 571-272-1114. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
